Health value framework

This dashboard is based upon the *Pathway to Health Value* conceptual framework developed by HPIO's Health Measurement Advisory Group. This framework includes seven domains—two domains that represent health value (population health and healthcare costs) and five domains that represent the systems and environments that impact health value.

Each domain includes several categories, called "subdomains." Each subdomain is made up of specific metrics. In total, this dashboard includes 27 subdomains and 106 metrics.

40 Population health

Ohioans are less healthy than people in most other states.

Ohio ranks 40th on a composite measure of population health. Thirty nine states are healthier. This overall rank is based on Ohio's rank in the following areas*:

- 38 Overall health and wellbeing** Length and quality of life
- 49 Health behaviors** Tobacco, alcohol, physical activity
- 41 Conditions and diseases** Physical, mental and oral health

Health

40 Healthcare costs

Ohio spends more than most other states on health care.

Ohio ranks 40th on a composite measure of healthcare costs. Thirty nine states spend less. This overall rank is based on Ohio's rank in the following areas*:

- 35 Total spending** Overall healthcare spending per capita and spending growth
- 32 Employer costs** Average premiums for single adults and families
- 23 Consumer costs** Commercial health spending per enrollee and out of pocket spending
- 49 Medicare spending** Spending per enrollee and spending growth

Cost

47 Health value in Ohio

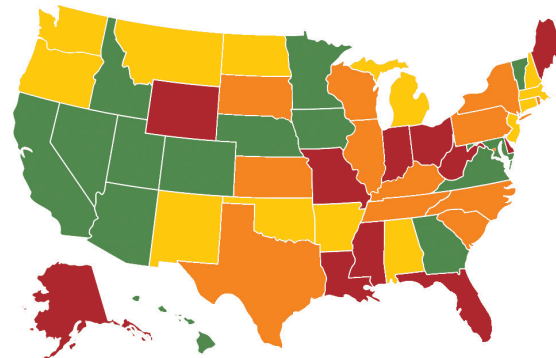

We are not getting good value for our healthcare dollar.

Ohio ranks 47th on a composite measure of health value—the combination of healthcare costs and population health, weighted equally.

Value

Health + Cost = Value

Where states rank in health value...

- Top quartile** of the 50 states and the District of Columbia.
- Second quartile** of the 50 states and the District of Columbia.
- Third quartile** of the 50 states and the District of Columbia.
- Bottom quartile** of the 50 states and the District of Columbia.

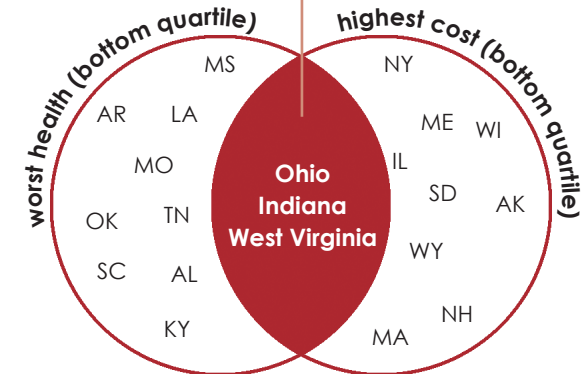

Highest value states

States in the top quartile for both population health and healthcare costs

Lowest value states

States in the bottom quartile for both population health and healthcare costs

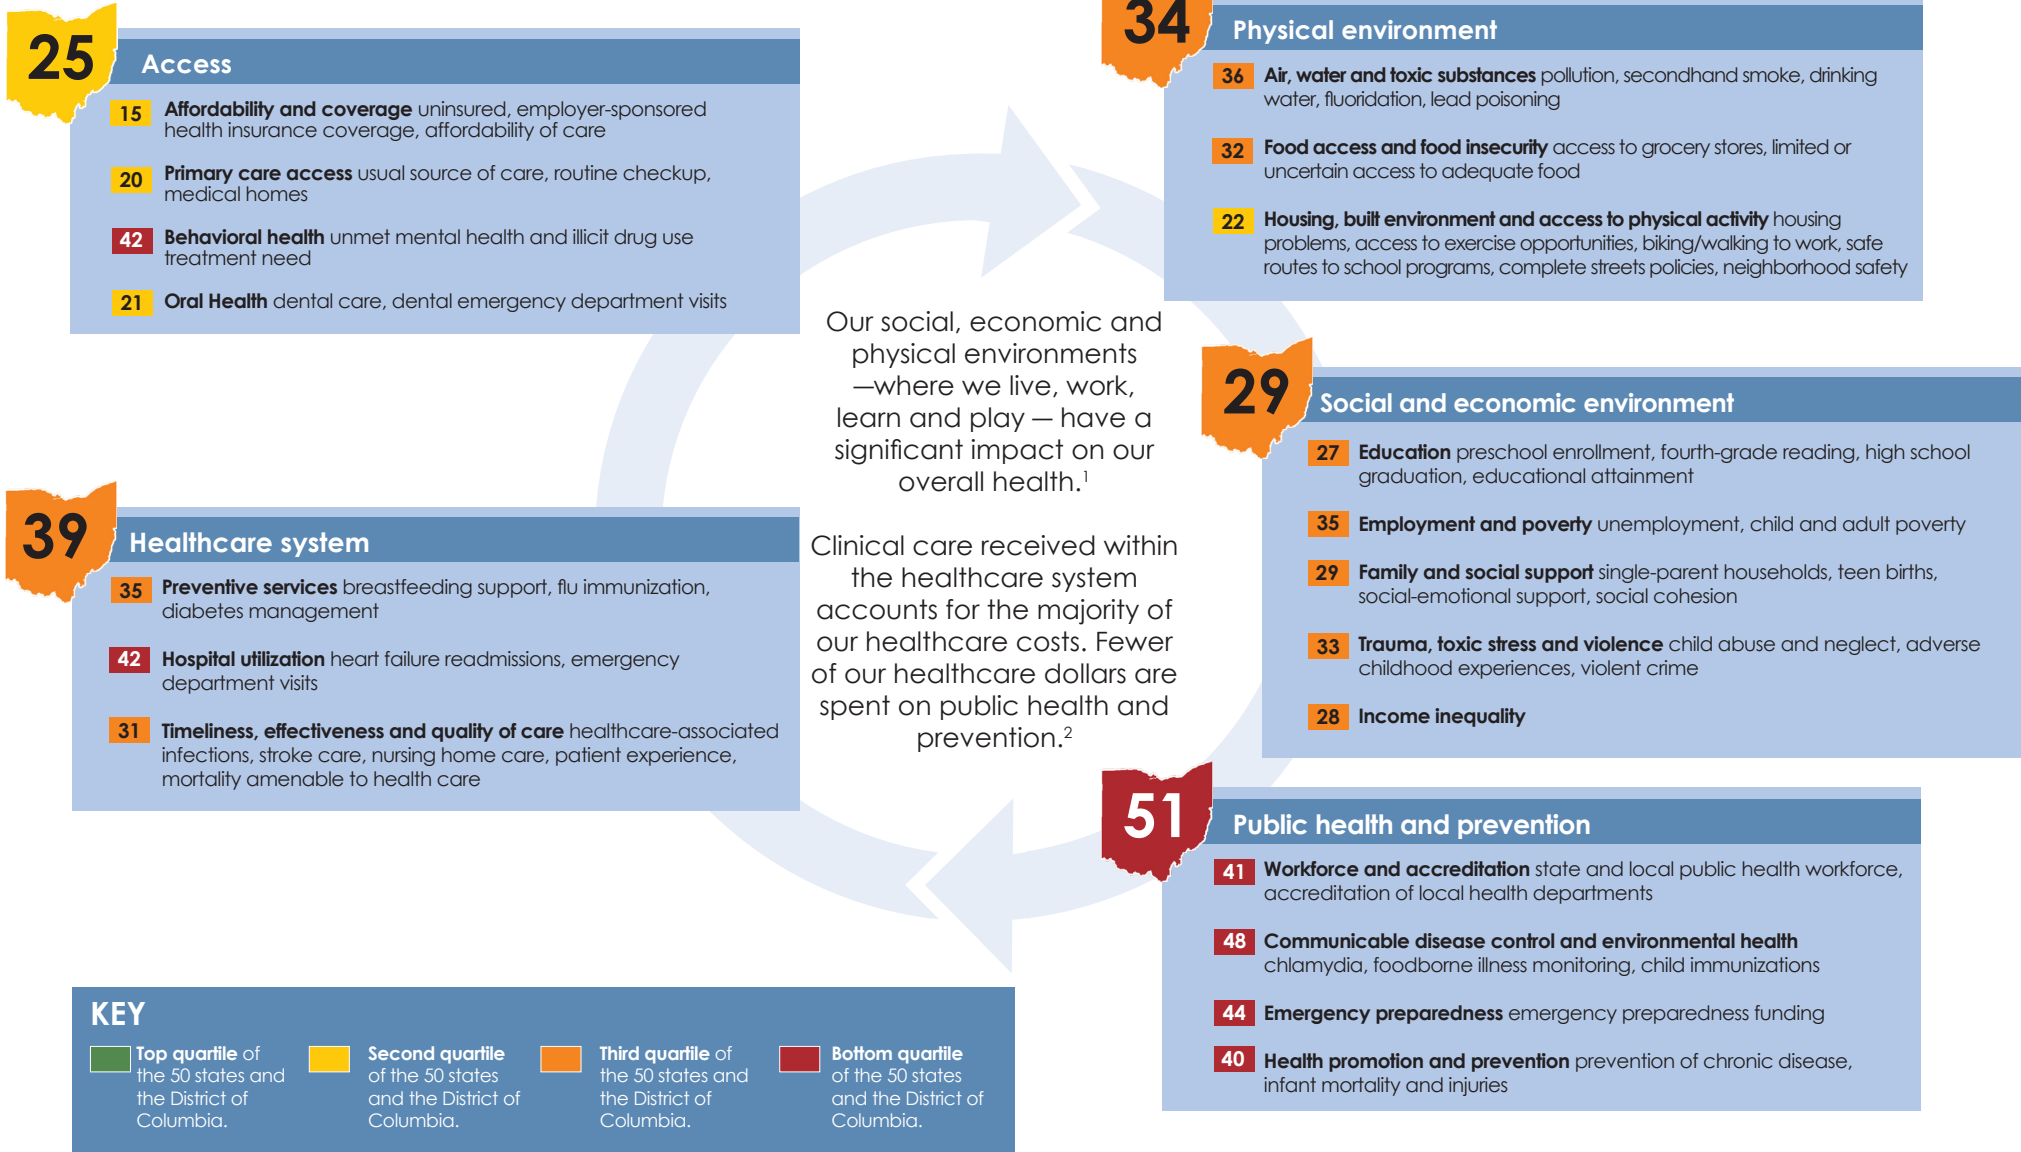

Note: Rankings for the above domains are based on most-recently available data from 2008 to 2013. A ranking of 1 is the best and 51 is the worst.

*The overall domain rank (e.g. healthcare costs) is the composite of the sub-domain ranks (e.g. total and employer). The subdomain ranks are the composite of the ranks for the individual metrics (e.g. healthcare spending per capita).

Why does Ohio rank so poorly on health value?

In order to improve health value, Ohio must address the many factors that impact population health outcomes and healthcare costs. Public health and prevention and the healthcare system in Ohio face significant challenges. Ohio also struggles when it comes to the physical, social and economic environments that impact health.

For methodology and sources, see appendix or view the Health Value Dashboard online at: www.healthpolicyohio.org/2014-health-value-dashboard

Note: Rankings for the above domains are based on most-recently available data from 2006 to 2014.

1. McGovern, et al. "The relative contribution of multiple determinants to health outcomes," Health Affairs, 2014.
 2. McGinnis, et al. "The case for more active policy attention to health promotion," Health Affairs, 2002.

Ohio's greatest health challenges

Ohio ranks in the bottom quartile among U.S. states and Washington D.C. for the following metrics...

Domain	Indicator	Ohio's rank	Most recent data	Best state
Population health	Adult smoking Percent of adults who are current smokers	44	23.4%	10.3% UT
	Adult diabetes Percent of adults diagnosed with diabetes	46	11.7%	7% AK
	Infant mortality Infant deaths per 100,000 population	47	7.69	3.8 AK
Healthcare system	Avoidable emergency department visits for Medicare beneficiaries Potentially avoidable emergency department visits among Medicare beneficiaries, per 1,000 beneficiaries	44	215	129 HI
Public health and prevention	State public health workforce Number of state public health agency staff FTEs per 100,000 population	44	9.9	250.7 WY
	Emergency preparedness funding Median per capita funding for emergency preparedness	44	\$1.50	\$9.93 DC
	Tobacco prevention spending Tobacco prevention and control spending, as percent of the CDC-recommended level	46	4.4%	114.8% ND
	Child immunization Percentage of children ages 19 to 35 months who have received vaccinations	48	61.7%	82.1% RI
Healthcare costs	Medicare spending growth per enrollee Average annual percent growth in Medicare spending per enrollee	45	5.2%	1.4% ND
Access	Unmet need for illicit drug use treatment Percent of individuals ages 12 and older needing but not receiving treatment for illicit drug use in the past year	43	2.6%	1.9% HI
Physical environment	Food insecurity Percent of households with uncertain access to adequate food	40	16.1%	8.7% ND
	Outdoor air quality Average exposure of the general public to particulate matter of 2.5 microns or less in size	47	11.6	5.3 WY
	Secondhand smoke Percent of children who live in home where someone uses tobacco or smokes inside home	49	10.3%	0.4% CA

Ohio's greatest health strengths

Ohio ranks in the top quartile among U.S. states and Washington D.C. for the following metrics...

Domain	Indicator	Ohio's rank	Most recent data	Best state
Public health and prevention	Accreditation of local health departments Percent of LHDs that have received accreditation (March 2013 to Sept. 2014)	11	3.2%	10% LA
Access	Employer-sponsored health insurance coverage Percent of all workers who work at a company that offers health insurance to its employees	11	86.8%	96.7% HI
Physical environment	Safe drinking water Percent of population exposed to water exceeding a violation limit during the past year	10	3%	0% DC
	Fluoridated water Percent of the population served by a community water system with optimally fluoridated water	12	92.2%	100% DC
	Severe housing problem Percent of households with problems such as severe overcrowding or costs that exceed 50% of monthly income	13	15%	11% ND

Strengths to maintain*

Challenges to improve

Domain	Ohio ranks in the second quartile for the following subdomains	Ohio ranks in the third quartile for the following subdomains	Ohio ranks in the fourth quartile for the following subdomains
Population health	None	Overall health and wellbeing	Health behaviors Conditions and diseases
Healthcare costs	Consumer costs	Total spending Employer costs	Medicare spending
Healthcare system	None	Preventive services Timeliness, effectiveness and quality of care	Hospital utilization
Access	Affordability and coverage Primary care access Oral health	None	Behavioral health
Public health and prevention	None	None	Public health workforce and accreditation Communicable disease control and environmental health Emergency preparedness Health promotion and prevention
Social and economic environment	None	Education Employment and poverty Family and social support Trauma, toxic stress and violence Inequality	None
Physical environment	None	Air, water and toxic substances Food access and food insecurity Housing, built environment and access to physical activity	None

* Ohio does not rank in the top quartile for any subdomains.

In order to improve health value for all Ohioans, it is important to identify and address disparities, or gaps, in outcomes between different groups. The following graphics display Ohio's three lowest-ranked population health outcomes broken out by race/ethnicity, income level, and county.

Adult Ohioans who are current smokers, by income level, 2013

Source: CDC, BRFSS

Infant mortality in Ohio, by race/ethnicity, 2012

Source: Ohio Department of Health

Adult Ohioans diagnosed with diabetes, by county, 2010

Source: CDC, BRFSS, as compiled by County Health Rankings and Roadmaps

A closer look

Additional data for many of the metrics included in this dashboard by race/ethnicity, income and education levels, age and local geography is available from the following websites: **Commonwealth Scorecard on Health System Performance (state and local versions)**, **Network of Care**, **RWJF DataHub** and **County Health Rankings and Roadmaps**. [Click here](#) for a crosswalk that indicates which dashboard metrics are available from these sources.

40 Population health in Ohio

Ohio ranks 40th in the nation on the population health domain

Indicator	Ohio's rank	Data value		Trend	Best state
		baseline	most recent		
Overall health and wellbeing		38			
Overall health status Percent of adults who report fair or poor health	33	18.3%	18.1%	+	12.1% VT
Limited activity due to health problems Average number of days in last 30 with limited activity	34	1.5	1.6	-	0.9 ND
Life expectancy Life expectancy at birth, in years	37	77.5	77.8	+	81.3 HI
Premature death Years of potential life lost before age 75	38	7,158	7,294	-	4,869 MN
Health behaviors		49			
Adult insufficient physical activity Percent of adults not meeting physical activity guidelines	33	78.6%	81%	-	73.3% CO
Adult binge drinking Percent of adults report binge drinking in past month	36	20.1%	18%	+	10.2% WV
Adult smoking Percent of adults who are current smokers	44	23.3%	23.4%	-	10.3% UT
Youth all-tobacco use Percent of high school students who used tobacco in past 30 days	NR*	27.9%	21.7%	+	5.6% UT
Conditions and diseases		41			
Suicide deaths Suicide deaths per 100,000 population	18	11.5	12.2	-	6.9 DC
Youth obesity Percent of high school students who are obese	27	14.7%	13%	+	6.4% UT
Drug overdose deaths Drug overdose deaths per 100,000 population	35	14.9	14	+	5 ND
Poor mental health Average number of days in past 30 where mental health was poor	36	4.1	4.1	=	2.8 ND
Cardiovascular disease mortality Heart-related deaths per 100,000 population	37	287.6	276.7	+	186.9 MN
Poor oral health Percent of adults who have lost teeth due to decay, infection or disease	38	11%	13%	-	5% UT
Infant mortality Infant deaths per 1,000 live births	47	7.7	7.9	-	3.75 AK
Adult diabetes Percent of adults diagnosed with diabetes	46	10%	11.7%	-	7% AK

Gaps in life expectancy

There are significant gaps in life expectancy for different groups of Ohioans. An African American child born in Ohio today can expect to live to age 73.9, more than a decade less than children in other racial/ethnic groups. African Americans in other states have much longer life expectancies. For example, African American life expectancy is 6.3 years longer in Minnesota (best state) than in Ohio.

Public health and mental health agency spending

Medicaid spending

25

Access in Ohio

Ohio ranks 25th in the nation on the access domain

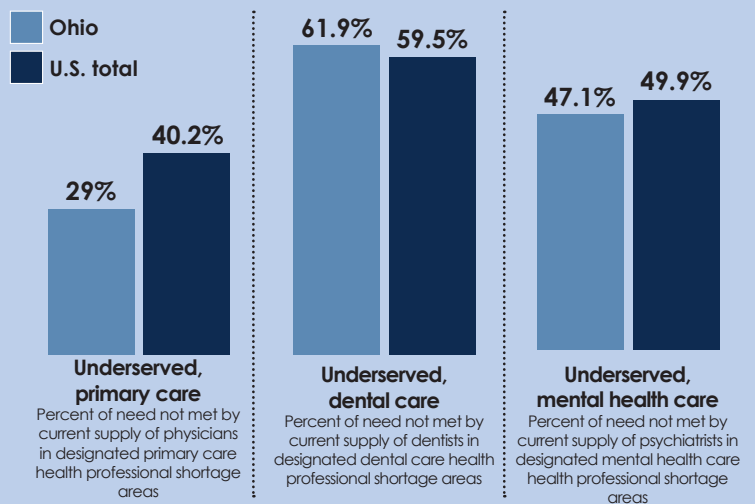

Indicator	Ohio's rank	Data value		Trend	Best state
		baseline	most recent		
Affordability and coverage					
15					
Uninsured adults Percent of 18-64 year olds who are uninsured	15	16.3%	15.7%	+	5.2% MA
Uninsured children Percent of 0-17 year olds who are uninsured	15	5.3%	5.3%	=	1.5% MA
Employer-sponsored health insurance coverage Percent of all workers who work at a company that offers health insurance to its employees	11	88.6%	86.8%	-	96.7% HI
Unable to see doctor due to cost Percent of adults who went without care because of cost in the past year	18	12%	14%	-	9% ND, HI, MA
Primary care access					
20					
Without a usual source of care Percent of adults who report they do not have at least one person they think of as their personal doctor or health care provider	19	15%	19%	-	11% MA
Routine checkup Percent of at-risk adults who have not visited a doctor for routine checkup in the past two years	20	14%	13%	+	6% MA
Medical home, children Percent of children have a usual source for sick and well care and receive effective care coordination when needed	24	66.2%	57%	-	69% VT
Behavioral health					
42					
Unmet need for mental health treatment Percent of adults ages 18 and older with past year mental illness who reported perceived need for treatment/counseling was not received	32	NA	21.7%	NA	11.1% HI
Unmet need for illicit drug use treatment Percent of individuals ages 12 and older needing but not receiving treatment for illicit drug use in the past year	43	NA	2.6%	NA	1.9% HI
Oral health					
21					
Received dental care in past year, adults Percent of adults ages 18 and older who reported having visited the dentist or dental clinic within the past year	19	NA	67.6%	NA	76.2% MA
Received dental care in past year, children Children under age 18 who have seen a dentist at least once for preventive dental care in the past year	23	79%	78%	-	88% VT

Gaps in ability to see doctor due to cost

More African Americans, Hispanics and people of other races in Ohio went without care because of cost in the past year than White Ohioans.

39 Healthcare system in Ohio

Ohio ranks 39th in the nation on the healthcare system domain

Indicator	Ohio's rank	Data value		Trend	Best state
		baseline	most recent		
Preventive services 35					
Breastfeeding support in hospitals Composite quality practice score for infant nutrition and care provided at hospitals and birth centers to support breastfeeding	21	69	71	+	88 NH
Flu vaccination Monthly cumulative influenza vaccination percent coverage estimates for persons ≥ 6 months of age	32	43.7%	44.8%	+	57.5% MA
Diabetes A1c measurements Percent of adults ages 18 and older with diagnosed diabetes who received 2 or more hemoglobin A1c measurements in the last year	36	67%	68.9%	+	80.5% ME
Prenatal care Percent of women who completed a pregnancy in the last 12 months and who received prenatal care in the first trimester	NR*	69.2%	68.5%	-	83.5% VT
Cancer early stage diagnosis, all Percent of all cancer cases diagnosed at an early stage	NR*	48.6%	49.8%	+	NA
Female breast cancer early stage diagnosis Percent of female breast cancer cases diagnosed at an early stage	NR*	66.8%	69.2%	+	NA
Colon and rectal cancer early stage diagnosis Percent of colon and rectal cancer cases diagnosed at an early stage	NR*	38.5%	38.5%	=	NA
Hospital utilization 42					
Heart failure readmissions for Medicare beneficiaries Percent of Medicare beneficiaries discharged from the hospital with a principal diagnosis of heart failure who were readmitted for any cause within 30 days after the index admission date	35	24.9%	25%	-	21.1% MT
Avoidable emergency department visits for Medicare beneficiaries Potentially avoidable emergency department visits among Medicare beneficiaries, per 1,000 beneficiaries	44	NA	215	NA	129 HI
All payer same hospital readmissions All payer 30-day same hospital readmissions as a percent of admissions or unplanned readmissions	NR*	9.5%	8.8%	+	NA
Timeliness, effectiveness and quality of care 31					
Healthcare-associated infections Composite of standardized infection ratios across six healthcare-associated infections	14	NA	0.79	NA	0.59 AK
Nursing home pressure ulcers Percent of long-stay high-risk nursing home residents impaired in bed mobility or transfer, comatose, or malnourished with pressure ulcers	19	NA	6%	NA	3% HI
Stroke care Percent of ischemic stroke patients who got medicine to break up a blood clot within 3 hours after symptoms started	28	NA	65%	NA	96% ND
Patient experience Percent of Medicare fee-for-service beneficiaries who had a doctor's office or clinic visit in the last 12 months whose doctor sometimes or never explained things in a way they could understand	31	4.2%	4.4%	-	1.7% VT
Mortality amenable to healthcare, all Number of deaths before age 75 per 100,000 population that resulted from causes considered at least partially treatable or preventable with timely and appropriate medical care	35	106	94	+	57 MN
Behavioral health					
Mental illness hospitalization follow-up Percent of Medicaid enrollees ages 6 and older who received follow-up after hospitalization for mental illness within 30 days of discharge	NR*	64.8%	64.9%	+	NA
Substance use disorder treatment retention Percent of individuals ages 12 and older with an intake assessment who received one outpatient index services within a week and two additional outpatient index services within 30 days of intake	NR*	36.4%	37.4%	+	NA

Gaps in healthcare preventable death

There are significant gaps among different groups in Ohio in the number of deaths considered at least partially treatable or preventable with timely and appropriate medical care. There are 84 more deaths per 100,000 population among African Americans than White Ohioans, and there are 71 more deaths per 100,000 population among Ohio African Americans compared to African Americans in Massachusetts.

Public health and prevention in Ohio

Ohio ranks 51st in the nation on the public health and prevention domain

Indicator	Ohio's rank	Data value		Trend	Best state
		baseline	most recent		
Public health workforce and accreditation		41			
Accreditation of local health departments Percent of LHDs that have received accreditation (March 2013 through September 2014)	11	NA	3.2%	NA	10% LA
Local public health workforce Median number of local health department FTEs per 100,000 population	30	39.5	36.6	-	136 MD
State public health workforce Number of state public health agency staff FTEs per 100,000 population	44	10.4	9.9	-	250.7 WY
Communicable disease control and environmental health		48			
Chlamydia Chlamydia rate per 100,000 population	33	443.4	456.4	-	140.6 NH
Foodborne illness monitoring Proportion of foodborne illness outbreaks for which an etiologic agent is confirmed	36	27.8%	47.3%	+	100% ♦
Child immunization Percent of children ages 19 to 35 months who have received vaccinations	48	66.8%	61.7%	-	82.1% RI
Emergency preparedness		44			
Emergency preparedness funding Total per capita funding for emergency preparedness	44	\$1.61	\$1.50	-	\$9.93 DC
Health promotion and prevention		40			
Falls among older adults Percent of adults age 65 and older who report having had a fall within the last 3 months	17	NA	26.7%	NA	14.5% WI
Cigarette tax State cigarette excise tax rate	27	\$1.25	\$1.25	=	\$4.35 NY
Sales of opioid pain relievers Kilograms of opioid pain relievers sold per 10,000 population	31	NA	7.9	NA	3.7 IL
Seat belt use Percent of front seat occupants using a seat belt	34	84.1%	82%	-	96.9% WA
Tobacco prevention spending Tobacco prevention and control spending, as percent of the CDC-recommended level	46	NA	4.4%	NA	114.8% ND
WIC at farmers markets Percent of farmers markets that accept WIC coupons	NR*	NA	22.6%	NA	76.8% NM
Safe sleep Percent of infants most often laid on his or her back to sleep	NR*	73%	76.8%	+	85.6% CO
Youth distracted driving Percent of youth who report that they texted or e-mailed while driving at least once during the past 30 days	NR*	NA	45.6%	NA	32.3% MA

Gaps in safe sleep practices

The American Academy of Pediatrics recommends that babies should be laid on their backs to sleep. This practice is recognized as an important component of infant mortality prevention. According to data from 2010, lower-income Ohioans were less likely than higher-income Ohioans to report that their baby was most often laid on his or her back to sleep.

♦ 14 states tied for best state

29 Social and economic environment in Ohio

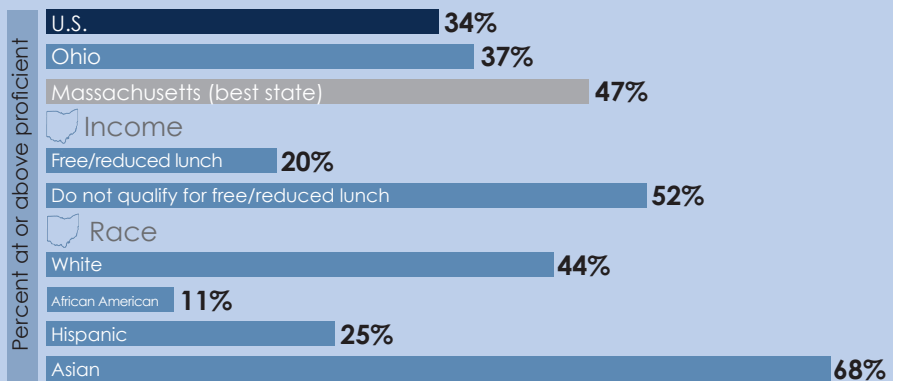

Ohio ranks 29th in the nation on the social and economic environment domain

Indicator	Ohio's rank	Data value		Trend	Best state
		baseline	most recent		
Education	27				
Fourth-grade reading Percent of 4th graders identified as proficient in reading by a national assessment (NAEP)	18	34%	37%	+	47% MA
High school graduation Percent of incoming 9th graders who graduate in 4 years from a high school with a regular degree	19	79.6%	81.4%	+	91.4% VT
Preschool enrollment Percent of 3 and 4 year-olds enrolled in preschool	27	45%	44%	-	73% DC
Educational attainment Percent of adults over age 25 with a bachelor's degree or higher	39	24.1%	24.1%	=	48.5% DC
Employment and poverty	35				
Child poverty Percent of persons under age 18 who live in households at or below the poverty threshold	29	21.7%	21.4%	+	11.1% WY
Unemployment Annual average unemployment rate, ages 16 and older	31	7.4%	7.4%	=	2.9% ND
Adult poverty Percent of persons age 18+ who live in households at or below the poverty threshold	35	13.1%	13.5%	-	7.2% NH
Family and social support	29				
Social-emotional support Percent of adults without social-emotional support	27	NA	19.5%	NA	14.1% MN
Social capital and cohesion Composite measure that includes connections with neighbors, supportive neighborhoods, voter turnout, and volunteerism	29	NA	8.2	NA	9.6 ID, IA, MN, UT
Teen birth rate Rate of births per 1,000 females 15-19 years of age	29	31.5	29.8	+	13.8 NH
Single-parent households Percent of children living in single-parent households	35	37%	37%	=	20% UT
Trauma, toxic stress and violence	33				
Violent crime Violent crime rate per 100,000 residents	20	NA	286.2	NA	121.1 VT
Child abuse and neglect Rate of child maltreatment victims per 1,000 children in population	34	11.4	11	+	1.25 PA
Adverse childhood experiences Percent of children who have experienced two or more adverse experiences	34	NA	25.8%	NA	16.3% NJ
Inequality	28				
Income inequality Gini coefficient (extent of inequality in the distribution of income)	28	0.46	0.47	-	0.41 AK

Gaps in fourth-grade reading proficiency

According to data from the 2013 National Assessment of Educational Progress (NAEP), 37% of Ohio fourth-grade public-school students scored at or above the proficient level on a reading achievement test, compared to 34% for the US overall. Proficiency is described as "solid academic performance" and indicates that a student has demonstrated competence over challenging subject matter. Begun in 1969, the NAEP provides a consistent way to compare student performance across states.

There are significant gaps in reading proficiency for different racial/ethnic and income groups. Only 20% of fourth graders who qualified for the free or reduced school lunch program, an indicator of economic disadvantage, were proficient in reading. Four times as many more White students (44%) in Ohio than African American students (11%) scored at or above proficient on the test.

				NR* No ranking , metric has 10 or more missing states	= No change		
					- Getting Worse		

NOTE: Rankings are based on the most recent data column. A ranking of 1 is the best and 51st is the worst. This dashboard uses data that is the most recently available for all states and DC. The year that is most-recently available varies by metric, from 2006 to 2013. See appendix for specific years for each metric.

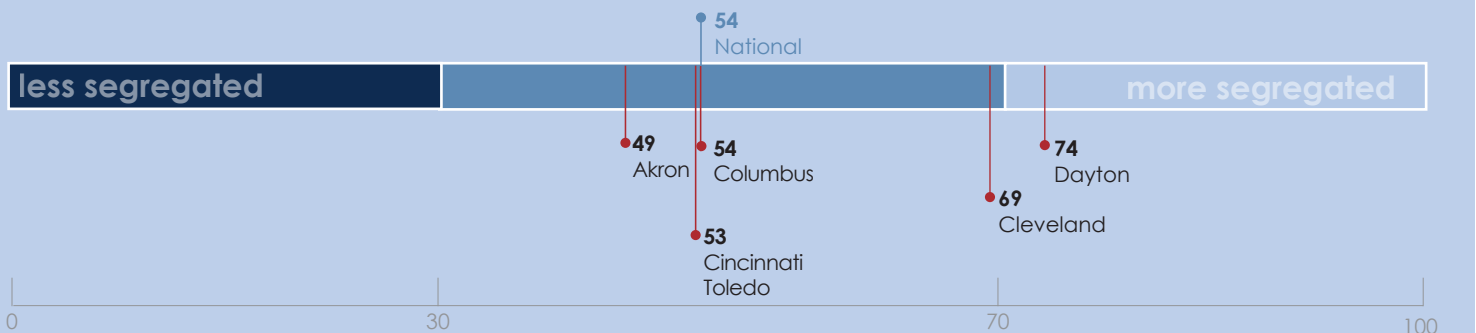

34 Physical environment in Ohio

Ohio ranks 34th in the nation on the physical environment domain

Indicator	Ohio's rank	Data value		Trend	Best state
		baseline	most recent		
Air, water and toxic substances					
36					
Safe drinking water Percent of population exposed to water exceeding a violation limit during the past year	10	NA	3%	NA	0% DC, WA
Fluoridated water Percent of the population served by a community water system with optimally fluoridated water	12	87.7%	92.2%	+	100% DC
Toxic pollutants Total pounds of toxic chemicals released into the environment per capita, including air, water, land on-site and deepwell injection	29	9.7	7.7	+	0.04 DC
Outdoor air quality Average exposure of the general public to particulate matter of 2.5 microns or less in size (PM2.2)	47	12	11.6	+	5.3 WY
Children exposed to secondhand smoke Percent of children who live in a home where someone uses tobacco or smokes inside the home	49	16.3%	10.3%	+	0.4% CA
Lead poisoning Percent of young children with elevated blood lead levels (BLL >10 ug/dL)	NR*	1.1%	1.1%	=	0.2% AZ, FL
Food access and food insecurity					
32					
Healthy food access Percent of low-income individuals living more than 10 miles from a grocery store in rural areas and more than 1 mile in non-rural areas	23	NA	12.2%	NA	0.9% DC
Food insecurity Percent of households with limited or uncertain access to adequate food	40	NA	16%	NA	8.7% ND
Housing, built environment and access to physical activity					
22					
Severe housing problems Percent of households that have one or more of the following problems: 1) housing unit lacks complete kitchen facilities, 2) housing unit lacks complete plumbing facilities, 3) household is severely overcrowded, 4) monthly housing costs, including utilities, exceed 50% of monthly income	13	NA	15%	NA	11% ND, WV
Access to exercise opportunities Percent of individuals in a county who live reasonably close to a location for physical activity	19	NA	78%	NA	100% DC
Neighborhood safety Percent of parents who report their children are living in a safe neighborhood	29	87.1%	88.3%	+	94.7% ID
Alternative commute modes Percent of trips to work via bicycle, walking, or mass transit (combined)	32	4.4%	4.3%	-	54.6% DC
Safe Routes to School programs Percent of schools that have a completed school travel plan	NR*	NA	33.1%	NA	NA
Complete Street policies Number of communities that have adopted complete streets policies	NR*	NA	12	NA	NA

Residential segregation

Brown University has developed a **dissimilarity index** to measure whether one particular group is distributed across census tracts in the metropolitan area in the same way as another group. A high value on the index's 100-point scale indicates that the two groups tend to live in different tracts. A value of 60 (or above) is considered very high. It means that 60% (or more) of the members of one group would need to move to a different tract in order for the two groups to be equally distributed. Values of 40 or 50 are usually considered a moderate level of segregation, and values of 30 or below are considered to be fairly low. Below are the African American/White dissimilarity indexes for five major metropolitan areas in Ohio.

KEY

Rank	■ Ohio ranks in the top quartile of the 50 states and the District of Columbia.	■ Ohio ranks in the second quartile of the 50 states and the District of Columbia.	■ Ohio ranks in the third quartile of the 50 states and the District of Columbia.	■ Ohio ranks in the bottom quartile of the 50 states and the District of Columbia.	NR No ranking , no assigned desired direction	Trend	+	Getting better
				NR* No ranking , metric has 10 or more missing states	=		No change	
					-		Getting Worse	

NOTE: Rankings are based on the most recent data column. A ranking of 1 is the best and 51st is the worst. This dashboard uses data that is the most recently available for all states and DC. The year that is most-recently available varies by metric, from 2006 to 2014. See appendix for specific years for each metric.

The Health Policy Institute of Ohio

Since 2003, HPIO has served as the only state-wide, nonpartisan organization in Ohio dedicated to providing evidence-based information and analysis on health policy issues to state policymakers and others interested in improving the health of Ohioans. HPIO's mission is to provide the independent, unbiased, and nonpartisan information and analysis needed to create sound health policy. The long-term outcome of HPIO's work is that state policymakers make informed policy decisions that lead to improved health value. While the primary audience for HPIO's work is state public policymakers, HPIO also engages a wide array of stakeholders in order to achieve its mission.

HPIO's Health Value Dashboard

The HPIO Health Value Dashboard is a tool to track Ohio's progress towards health value – which looks at the relationship between population health outcomes and healthcare costs. Population health outcomes and healthcare costs were weighted equally, reflective of feedback from our stakeholders that both goals, improved population health and sustainable healthcare costs, are important for Ohioans. The dashboard compares Ohio's performance to other states, tracks change over time and includes information on best state performance and disparities or "gaps" in performance across

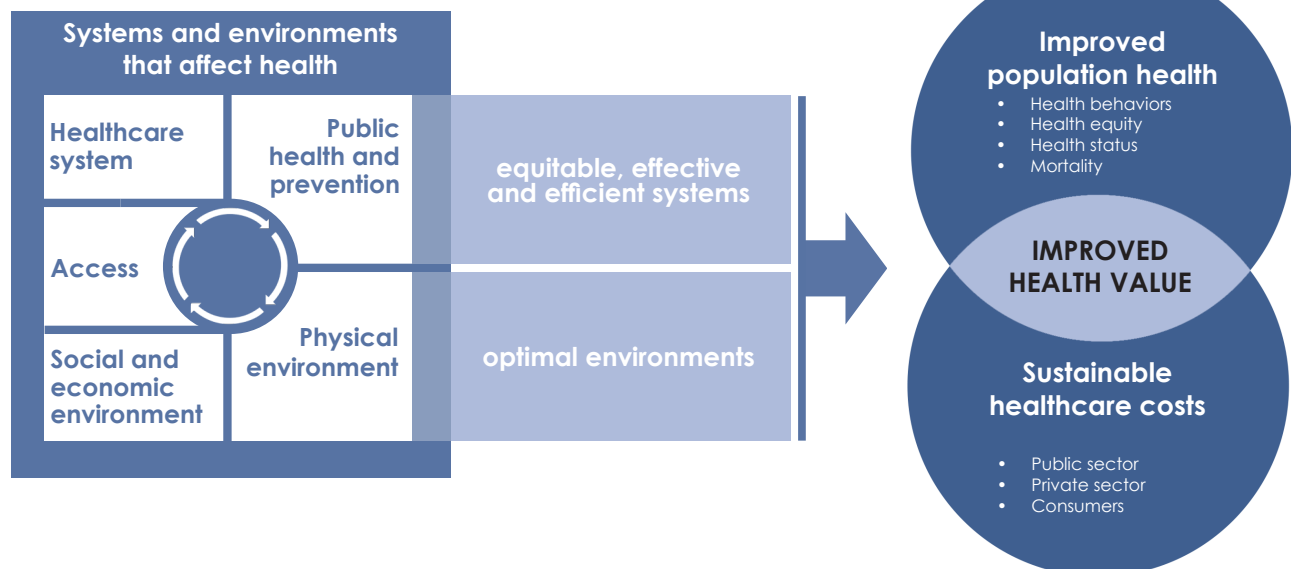

Ohio's subpopulations. The dashboard also reflects the many factors impacting population health outcomes and healthcare costs, including healthcare system performance, public health and prevention, access to health care, and the social, economic and physical environments.

Making data meaningful

In order to put Ohio data in context in a way that is meaningful for state policymakers and other stakeholders, this dashboard presents the following information:

- **State rank for metrics:** Performance for all states and the District of Columbia is ranked for each metric, with 1 being the best and 51 the worst. These ranks are then divided into quartiles with green indicating the top (best) quartile and red indicating the bottom (worst) quartile.
- **State rank for subdomains and domains:** In order to provide a summary look at the data, the metric ranks are "rolled up" into subdomain and domain ranks. Subdomain ranks are the composite rank of the metrics in each subdomain, weighted equally. Domain ranks are the composite rank of the sub-domain ranks, weighted equally.
- **Change over time:** When available, the dashboard includes data values for the most-recent time period and for a baseline time period, which is the next most recently-available time period.

HPIO Pathway to Health Value

What makes the HPIO health value dashboard different?

	America's Health Rankings	Commonwealth Scorecard	County Health Rankings	Kaiser State Health Facts	Gallup-Healthways Wellbeing Index	RWJF DataHub	Network of Care	HPIO
Primary format	Interactive & At-a-glance	Interactive & At-a-glance	Interactive	Interactive	At-a-glance	Interactive	Interactive	At-a-glance (Phase 1)
Population health	adequately covered	adequately covered	adequately covered	adequately covered	adequately covered	adequately covered	adequately covered	adequately covered
Healthcare costs	not covered	adequately covered	adequately covered	adequately covered	not covered	adequately covered	adequately covered	adequately covered

= adequately covered
 = minimally covered
 = not covered

Any change in the desired direction from the baseline to the most recent time period is labeled as “getting better” [+], while any change in the opposite direction is labeled as “getting worse” [-]. No change is labeled as [=]

- **Best state:** The data value for the top-ranked state is listed for each metric. This provides a benchmark that indicates the magnitude of improvement needed for Ohio to be ranked more highly in the future.
- **Gaps:** Domain profiles include “break outs” by race/ethnicity or income level for a featured metric or set of metrics. These graphics highlight health disparities and point to opportunities to improve health for all groups in Ohio.

HPIO’s Health Value Dashboard process

Beginning in the spring of 2013, HPIO convened a Health Measurement Advisory Group (HMAG) (see page 18 for full list of HMAG members) to develop consensus on how to define and track Ohio’s progress in improving health value for Ohioans. HMAG guided the creation of HPIO’s conceptual framework for the HPIO Health Value Dashboard, *A Pathway to Health Value* and the selection of metrics for the dashboard.

The conceptual framework defines health value as the relationship between population health outcomes and healthcare costs. The framework also outlines the multiple factors that impact population health and healthcare costs, including access to care, the healthcare system, public

health and prevention, and the social, economic and physical environments.

HPIO’s dashboard is unique in that it tracks Ohio’s performance across all of these seven domains. Existing scorecards and dashboards are more narrow in scope and do not track health value by factoring in health costs or determinants outside of the healthcare system.

Metric selection

From September 2013 to May 2014, HMAG was charged with reviewing, prioritizing and selecting a streamlined and standardized set of metrics for the dashboard. HMAG members were placed into seven workgroups reflecting the seven domains of the conceptual framework (population health, healthcare costs, access, healthcare system, public health and prevention, social and economic and physical environment). Each workgroup was then tasked with selecting approximately fifteen metrics that were most powerful for tracking progress in each of the respective domains to include in this dashboard.

A set of criteria developed by HPIO and HMAG was used to guide the metric selection discussions (see pg. 17 for metric selection criteria). Each domain was required to include at least one “equity” metric. Equity metrics were selected to track a state’s variation in performance across racial and ethnic groups or income level.

In order to leverage existing scorecards and align with national initiatives, HPIO’s dashboard builds

upon metrics currently reported in America's Health Rankings, County Health Rankings, Commonwealth Fund Scorecards, Kaiser State Health Facts and the RWJF DataHub.

In total, HMAG identified 106 metrics with state-level data to include in the Dashboard (For a full list of metrics and detailed metric descriptions, see pg. 19 or access the metrics online at www.hpio.net/groups/health-measurement). There are 14 to 17 metrics in each domain of the Dashboard.

Data sources and years

HPIO commissioned the University of Cincinnati Economics Center to assist in data compilation, analysis, and state rankings of the 106 metrics.

The 106 metrics are categorized into seven domains and 27 subdomains across the seven domains.

The most recently-available two years of data were compiled for 77 of the 106 metrics. Twenty nine metrics only had one year of data available. The year that is most-recently available varies by metric, from 2006 to 2014. The baseline year varies by metric, from 2004 to 2013.

When possible, data were collected for all states and Washington, D.C. Nineteen of the 106 metrics are missing data from ten or more states for the most recent year.

Data were compiled from publicly available sources, including federal and state government databases, national surveys, vital statistics, and national registries.

Methodology

Ranking methodology overview

The University of Cincinnati Economics Center calculated rankings for each individual metric, subdomain, domain, and a composite measure of Health Value. The Health Value rank is a composite rank of two domains, population health and healthcare costs, equally weighted.

In order to calculate these rankings, the Economics Center assigned a rank of 1 to the state which performed best on a particular

metric. Assuming that no states were missing, a state that performed the poorest was assigned a value of 51. However, given that some metrics had missing state data, each state was also given a percentile ranking. In statistics, the percentile rank of an observation's value indicates the percentage of values that are lower than the current observation. For example, if a state's percentile rank is the 30th percentile, then 30% of states have a value which is lower performing.

When calculating the ranking for a domain across all metrics, the Economics Center summed the percentile rankings across every metric in that domain. As a result, each metric was weighted equally in its contribution to the final domain ranking. The summed percentile value for each state was then ranked to determine each state's particular sub-domain and domain ranking. The maximum score for the summed percentile value is the number of metrics in that particular domain. For example, if a domain contained 15 metrics and a state was the best performing state for each metric, then the summed percentile value would be 15 (i.e. the percentile ranking for each metric was 1), indicating that 100% of the other states were lower performing.

In calculating the rankings, the Economics Center determined whether a higher value or lower value on a particular metric translates into better health. For example, if a state is at the 90th percentile for flu vaccinations, then 90% of states have a **lower** percentage of residents which are vaccinated. If a state is ranked at the 90th percentile for air pollution levels, then 90% of states have **higher** levels of pollutants in the air.

To determine the composite health value rank, the Economics Center calculated the average ranking of a state's population health and healthcare costs ranking, with each domain equally weighted. Based on this averaged value, the Economics Center determined a state's health value ranking based on its order. For example, consider one state with a ranking of 40 and 46, and another state with a ranking of 38 and 50. The first state's average ranking is 43 and the second state's average ranking is 44. The first state would then be ranked ahead of the second state.

Final criteria approved by Advisory Committee on July 11, 2013

1. **State-level:** Statewide data are available for Ohio and other states. State data is consistent across states (allowing for state rankings, if appropriate).
2. **Sub-state geography:** Data are available at the regional, county, city, or other geographic level within Ohio.
3. **Ability to track disparities:** Data are available for sub-categories such as race/ethnicity, income level, age, or gender.
4. **Availability and consistency:** There is a high probability that data for this metric will continue to be gathered in the future and will be provided in a relatively consistent format across time periods.
5. **Timeliness:** Data for this metric is released on a regular basis (at least yearly or every other year).
6. **Source integrity:** The metric is nationally recognized as a valid and reliable indicator and the data are provided by a reputable national organization or state or federal agency.
7. **Data quality:** The data are complete and accurate. The data collection method is the best available for the construct being measured (e.g., biometric, self-report, administrative).
8. **Alignment:** Aligns with an existing requirement, performance measure, program evaluation indicator, or other measures currently being compiled by a state or federal agency (e.g., ODH, OHT, ODE, CMS, HHS, AHRQ), national organization (e.g. Catalyst for Payment Reform), or regional project (e.g., Health Collaborative, AccessHealth Columbus, Better Health Greater Cleveland). Does not add data collection burden to stakeholders.
9. **Benchmarks:** Benchmark values have been established for the metric by a reputable state or national organization or agency (e.g., Healthy People 2020).
10. **Face value:** The metric is easily understood by the public and policymakers.
11. **Relevance:** The metric addresses an important health-related issue that affects a significant number of Ohioans.

Workgroups rated metrics on a scale of 1-3 for each criteria:

- 1=Low
- 2=Medium
- 3=High

Workgroups used the rating scores to guide prioritization of a maximum of 15 metrics, along with the guiding principles.

Guiding principles for developing a balanced set of metrics within each domain

The goal was to develop a stream-lined set of measures that addresses an appropriate variety of constructs and balances the following characteristics:

1. Process and outcome indicators
2. New/innovative measures and traditional measures with extensive trend data over time
3. Metrics that can likely be improved in the short-term (1-3 years) and those that will take much longer to impact (4+ years)
4. Overall population and specific populations (e.g., Medicaid, Medicare, adult/child)

Additional criteria to be assessed by HPIO

Accessibility, efficiency and feasibility: Data must be publicly available or can be provided by initiative partners at low or no cost. Data require minimal analysis to be presented in a dashboard format.

Population health

Healthcare costs	Medicaid	Medicaid spending per enrollee, disabled	Average amount Medicaid spends per enrollee in the disabled enrollment group. Spending includes state and federal payments to Medicaid but does not include disproportionate share hospital payments.	FY 2009	FY 2010	0	Kaiser Commission on Medicaid and the Uninsured and Urban Institute estimates of Medicaid Statistical Information Statistics and CMS-64 reports as compiled by the RWJF DataHub	No	NDD
Healthcare costs	Medicaid	Medicaid spending per enrollee, adult	Average amount Medicaid spends per enrollee in the adult enrollment group. Spending includes state and federal payments to Medicaid but does not include disproportionate share hospital payments.	FY 2009	FY 2010	0	Kaiser Commission on Medicaid and the Uninsured and Urban Institute estimates of Medicaid Statistical Information Statistics and CMS-64 reports as compiled by the RWJF DataHub	No	NDD
Healthcare costs	Medicaid	Medicaid spending per enrollee, children	Average amount Medicaid spends per enrollee in the children enrollment group. Spending includes state and federal payments to Medicaid but does not include disproportionate share hospital payments.	FY 2009	FY 2010	0	Kaiser Commission on Medicaid and the Uninsured and Urban Institute estimates of Medicaid Statistical Information Statistics and CMS-64 reports as compiled by the RWJF DataHub	No	NDD
Healthcare costs	Public health and mental health	Local public health funding per capita	Per capita median of total annual expenditures for local health departments.	2010	2013	15	National Association of County & City Health Officials	No	NDD
Healthcare costs	Public health and mental health	State public health funding per capita	State public health budget funding per capita during the fiscal year. Dollar amount represents state funding only.	FY 2011-2012	FY 2012-2013	0	Trust for America's Health as compiled by the RWJF DataHub	No	NDD
Healthcare costs	Public health and mental health	State mental health agency funding per capita	State mental health agency per capita mental health services expenditures. Expenditures reflect spending in the state fiscal year.	FY 2009	FY 2010	0	National Association of State Mental Health Program Directors Research Institute, Inc as compiled by Kaiser Family Foundation	No	NDD
Access	Affordability & coverage	Uninsured adults	Percent of 18-64 year olds that are uninsured in the state.	2012	2013	0	US Census Bureau American Community Survey	Yes	Down
Access	Affordability & coverage	Uninsured children	Percent of 0-17 year olds that are uninsured in the state.	2012	2013	0	US Census Bureau American Community Survey	Yes	Down
Access	Affordability & coverage	Lack of dental insurance	Data is not yet available for this metric.	-	-	NA	NA	No	Down

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Access	Affordability & coverage	Employer-sponsored health insurance coverage	Percent of all workers who work at a company that offers health insurance to its employees. Data represents 2 year estimates except in 2012.	2010-2011	2012-2013	0	Medical Expenditure Panel Survey - Insurance Component (MEPS-IC), Agency for Healthcare Research and Quality (AHRQ), Center for Financing, Access and Cost Trends (CFACT) as compiled by the RWJF DataHub	Yes	Up
Access	Affordability & coverage	Unable to see doctor due to cost	Percent of adults who went without care because of cost in the past year.	2007	2012	0	Behavioral Risk Factor Surveillance System as analyzed and compiled by Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	Yes	Down
Access	Primary care access	Without a usual source of care	Percent of adults who report they do not have at least one person they think of as their personal doctor or health care provider.	2007	2012	0	University of Cincinnati Economics Center analysis of the Commonwealth Fund State Scorecard on Healthcare System Performance, 2014 data	Yes	Down
Access	Primary care access	Routine checkup	Percent of at-risk adults who have not visited a doctor for routine checkup in the past two years. For more information on this metric, see Appendix B in the Commonwealth Fund State Scorecard on Healthcare System Performance, 2014	2007	2012	0	Behavioral Risk Factor Surveillance System as analyzed and compiled by Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	Yes	Down
Access	Primary care access	Medical home, children	Percent of children who have a personal doctor or nurse, have a usual source for sick and well care, receive family-centered care, have no problems getting needed referrals, and receive effective care coordination when needed. For more information on this metric, see Appendix B in the Commonwealth Fund State Scorecard on Healthcare System Performance, 2014 .	2007	2011-2012	0	National Survey on Children's Health as analyzed and compiled by the Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	Yes	Up
Access	Behavioral health	Unmet need for mental health	Percent of adults ages 18 and older with past year mental illness who reported perceived need for treatment/counseling was not received. Data represents the annual average for years 2010-2012.	-	2010-2012	0	SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health	Yes	Down
Access	Behavioral health	Unmet need for illicit drug use treatment	Percent of individuals, ages 12 and older needing but not receiving treatment for illicit drug use in the past year. Refers to respondents needing treatment for illicit drugs, but not receiving treatment for an illicit drug problem at a special facility (i.e., drug and alcohol rehabilitation facilities [inpatient or outpatient], hospitals [inpatient only], and mental health centers). Data represents annual averages for 2011 and 2012.	-	2011-2012	0	SAMHSA, Center for Behavioral Health Statistics and Quality, National Survey on Drug Use and Health	Yes	Down

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Access	Oral health	Received dental care in past year, adults	Data represent adults ages 18 and older, who reported having visited the dentist or dental clinic within the past year for any reason. Percentages are weighted to reflect population characteristics.	-	2012	0	KCMU analysis of the Center for Disease Control and Prevention Behavioral Risk Factor Surveillance System 2012 Survey Results as compiled by Kaiser State Health Facts	Yes	Up
Access	Oral health	Received dental care in past year, children	Children under age 18 who have seen a dentist at least once for preventive dental care, such as check-ups and dental cleanings, in the past year.	2007	2011-2012	0	National Survey of Children's Health as analyzed and compiled by Kids Count Data Center	Yes	Up
Access	Oral health	Cost of avoidable ED dental visits	Data is not yet available for this metric.	-	-	NA	NA	No	Down
Access	Workforce	Underserved, primary care	Percent of need not met by current supply in designated primary care health professional shortage areas.	-	11/2014	OH only data	UC Economics Center analysis of Health Resources Services Administration data	No	Down
Access	Workforce	Underserved, dental care	Percent of need not met by current supply in designated dental care health professional shortage areas.	-	11/2014	OH only data	UC Economics Center analysis of Health Resources Services Administration data	No	Down
Access	Workforce	Underserved, mental health care	Percent of need not met by current supply in designated mental health care professional shortage areas.	-	11/2014	OH only data	UC Economics Center analysis of Health Resources Services Administration data	No	Down
Access	Equity	Unable to see doctor due to cost, White	Percent of adults who went without care because of cost in the past year.	2007	2012	0	Behavioral Risk Factor Surveillance System as analyzed and compiled by Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	No	Down
Access	Equity	Unable to see doctor due to cost, Black	Percent of adults who went without care because of cost in the past year.	2007	2012	9	Behavioral Risk Factor Surveillance System as analyzed and compiled by Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	No	Down
Access	Equity	Unable to see doctor due to cost, Hispanic	Percent of adults who went without care because of cost in the past year.	2007	2012	1	Behavioral Risk Factor Surveillance System as analyzed and compiled by Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	No	Down

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Access	Equity	Unable to see doctor due to cost, other	Percent of adults who went without care because of cost in the past year.	2007	2012	0	Behavioral Risk Factor Surveillance System as analyzed and compiled by Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	No	Down
Healthcare system	Preventive services	Breastfeeding support in hospitals	Composite Quality Practice Score for infant nutrition and care provided at hospitals and birth centers to support breastfeeding. The Composite Quality Practice Score is made up of subscores for practices in 7 dimensions of care. Scores range from 0 to 100. 100 is the highest, best possible score. The HPIO rankings differ from mPINC data because of the inclusion of Puerto Rico and other territories in that data.	2009	2011	0	National Survey of Maternity Practices in Infant Nutrition and Care, mPINC survey, Centers for Disease Control and Prevention	Yes	Up
Healthcare system	Preventive services	Diabetes A1c measurements	Percent of adults 18 and older with diagnosed diabetes who received 2 or more hemoglobin A1c measurements in the last year (age-adjusted).	2009	2010	5	Centers for Disease Control and Prevention Behavioral Risk Factor Surveillance System	Yes	Up
Healthcare system	Preventive services	Cancer early stage diagnosis, all	Percent of all cancer cases diagnosed at an early stage.	2010	2011	OH only data	Ohio Cancer Incidence Surveillance System	No	Up
Healthcare system	Preventive services	Cancer early stage diagnosis, female breast cancer cases	Percent of female breast cancer cases diagnosed at an early stage. The denominator is total female cases in Ohio and the numerator is early stage female cases.	2010	2011	OH only data	Ohio Cancer Incidence Surveillance System	No	Up
Healthcare system	Preventive services	Cancer early stage diagnosis, colon and rectal cancer cases	Percent of colon and rectal cancer cases diagnosed at an early stage.	2010	2011	OH only data	Ohio Cancer Incidence Surveillance System	No	Up
Healthcare system	Preventive services	Flu vaccination	Monthly cumulative influenza vaccination percent coverage estimates for persons \geq 6 months of age.	06/2011-05/2012	06/2012-05/2013	0	National Immunization Survey and Behavioral Risk Factor Surveillance System, Centers for Disease Control and Prevention FluVaxView	Yes	Up
Healthcare system	Preventive services	Prenatal care	Percent of women who completed a pregnancy in the last 12 months and who received prenatal care in the first trimester.	2011	2012	12	National Vital Statistics System, Centers for Disease Control and Prevention	No	Up

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Healthcare system	Behavioral health	Mental illness hospitalization follow-up	The percentage of discharges for continuous and non-continuously enrolled Medicaid members 6 years of age and older who were hospitalized for treatment of selected mental health disorders and who had an outpatient visit, an intensive outpatient encounter or partial hospitalization with a mental health practitioner within 30 days of discharge. The numerator was the number of discharges for psychiatric patients and the denominator was the number of discharges for psychiatric patients to an outpatient provider meeting measure specifications.	2013	2014	OH only data	Ohio Department of Mental Health and Addiction Services	No	Up
Healthcare system	Behavioral health	Substance use disorder treatment retention	The percent of clients ages 12 or older with an intake assessment who received one outpatient index service within 7 days and 2 additional outpatient index services within 30 days of intake. The numerator was all persons who have at least one clinical service within 7 days of assessment and 2 more clinical services within 30 days of assessment and the denominator was all persons receiving an alcohol or other drug assessment at intake.	2013	2014	OH only data	Ohio Department of Mental Health and Addiction Services	No	Up
Healthcare system	Hospital utilization	All payer same hospital readmissions	All payer 30-day same hospital readmissions as a percent of admissions or unplanned readmissions.	2011	2012	OH only data	Ohio Hospital Association	No	Down
Healthcare system	Hospital utilization	Heart failure readmissions for Medicare beneficiaries	Percent of Medicare beneficiaries discharged from the hospital with a principal diagnosis of heart failure who were readmitted for any cause within 30 days after the index admission date. This metric is hospital-specific, risk-standardized, and all-cause.	2010	2011	0	Centers for Medicare & Medicaid Services	Yes	Down
Healthcare system	Hospital utilization	Avoidable emergency department visits for Medicare beneficiaries	Potentially avoidable emergency department visits among Medicare beneficiaries, per 1,000 beneficiaries. For more information on this metric, see Appendix B in the Commonwealth Fund State Scorecard on Healthcare System Performance, 2014 .	-	2011	0	Analysis of J.Zheng and A.Jha, Harvard School of Public Health as compiled by the Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	Yes	Down

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Healthcare system	Timeliness, effectiveness and quality of care	Healthcare-associated infections	Composite of standardized infection ratios across six healthcare-associated infections. The six healthcare-associated infections are: (1) central line-associated bloodstream infections, CLABSI (2) catheter-associated urinary tract infections, CAUTI (3) surgical site infections, Colon Surgery, SSI (4) surgical site infections, abdominal hysterectomy surgery, SSI (5) hospital-onset clostridium difficile infections (6) hospital-onset MRSA bloodstream infections. The SIR for a state is adjusted to account for factors that might cause infection rates to be higher or lower, such as hospital size, teaching status, the type of patients a hospital serves, and surgery and patient characteristics.	-	2012	0	University of Cincinnati Economic Center analysis of Centers for Disease Control and Prevention data	Yes	Down
Healthcare system	Timeliness, effectiveness and quality of care	Stroke care	Percent of ischemic stroke patients who got medicine to break up a blood clot within 3 hours after symptoms started.	-	01/2013-09/2013	0	Centers for Medicare & Medicaid Services	Yes	Up
Healthcare system	Timeliness, effectiveness and quality of care	Nursing home pressure ulcers	Percent of long-stay high-risk nursing home residents impaired in bed mobility or transfer, comatose, or malnourished with pressure ulcers. For more information on this metric, see Appendix B in the Commonwealth Fund State Scorecard on Healthcare System Performance, 2014 .	-	7/2012-3/2013	0	Centers for Medicare & Medicaid Services as compiled by the Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	Yes	Down
Healthcare system	Timeliness, effectiveness and quality of care	Patient experience	Percent of Medicare fee-for-service beneficiaries who had a doctor's office or clinic visit in the last 12 months whose doctor sometimes or never explained things in a way they could understand	2010	2011	0	Agency for Healthcare Research and Quality, Center for Quality Improvement and Patient Safety, National CAHPS Benchmarking Database	Yes	Down
Healthcare system	Timeliness, effectiveness and quality of care	Mortality amenable to healthcare, all	Number of deaths before age 75 per 100,000 population that resulted from causes considered at least partially treatable or preventable with timely and appropriate medical care. For more information on this metric, see Appendix B in the Commonwealth Fund State Scorecard on Healthcare System Performance, 2014	2004-2005	2009-2010	0	Centers for Disease Control National Vital Statistics System as analyzed and compiled by the Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	Yes	Down
Healthcare system	Equity	Mortality amenable to healthcare, Black	Number of Black deaths before age 75 per 100,000 population that resulted from causes considered at least partially treatable or preventable with timely and appropriate medical care. For more information on this metric, see Appendix B in the Commonwealth Fund State Scorecard on Healthcare System Performance, 2014	2004-2005	2009-2010	13	Centers for Disease Control National Vital Statistics System as analyzed and compiled by the Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	No	Down

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Healthcare system	Equity	Mortality amenable to healthcare, White	Number of White deaths before age 75 per 100,000 population that resulted from causes considered at least partially treatable or preventable with timely and appropriate medical care. For more information on this metric, see Appendix B in the Commonwealth Fund State Scorecard on Healthcare System Performance, 2014	2004-2005	2009-2010	0	Centers for Disease Control National Vital Statistics System as analyzed and compiled by the Commonwealth Fund State Scorecard on Healthcare System Performance 2014 edition	No	Down
Public health and prevention	Workforce and accreditation	State public health workforce	Number of state public health agency staff FTEs per 100,000 population. Data normalized per 100,000 population. ASTHO data were used to obtain the numerator and the American Community Survey 1-year population estimates for 2011 and 2012 were used for the denominator.	2011	2012	2	Association of State and Territorial Health Officials	Yes	Up
Public health and prevention	Workforce and accreditation	Local public health workforce	Median number of local health department FTEs per 100,000 population	2010	2013	6	National Association of County and City Health Officials	Yes	Up
Public health and prevention	Workforce and accreditation	Accreditation of local health departments	Percent of local health departments that have received accreditation from the Public Health Accreditation Board. PHAB accreditation is a relatively new process; 2013 was the first year that health departments began achieving accreditation. This source is updated periodically throughout the year.	-	2014 (accessed 9/14/14)	0	Public Health Accreditation Board (numerator); National Association of County and City Health Officials (denominator)	Yes	Up
Public health and prevention	Communicable disease control and environmental health	Chlamydia	Chlamydia rate per 100,000 population	2012	2013	0	National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention, as compiled by America's Health Rankings 2013 Edition	Yes	Down
Public health and prevention	Communicable disease control and environmental health	Foodborne illness monitoring	Proportion of foodborne illness outbreaks reported to Centers for Disease Control and Prevention for which an etiologic agent is confirmed. This metric is included in the National Health Security Preparedness Index. Multiple confirmed/suspected in one food was counted as a single report. So long as it contained at least one confirmed, it was reported as confirmed. Does not include multistate outbreaks.	2011	2012	2	Foodborne Online Outbreak Database	Yes	Up
Public health and prevention	Communicable disease control and environmental health	Child immunization	Percent of children ages 19 to 35 months who received all recommended vaccines (DTaP, poliovirus, measles, Hib, HepB, varicella, PCV)	2012	2013	1	National Immunization Survey as compiled by RWJF DataHub	Yes	Up

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Public health and prevention	Emergency preparedness	Emergency preparedness funding	Total per capita funding for state and local health departments' emergency preparedness (Public Health Emergency Preparedness). Data normalized to per capita. Base population year was 2012 from American Community Survey. 2013 population base estimates are not yet available.	FY 2012	FY 2013	0	Centers for Disease Control and Prevention, US Census	Yes	Up
Public health and prevention	Health promotion and prevention	Cigarette tax	State cigarette excise tax rate	2012	2013	0	Centers for Disease Control and Prevention, as compiled by RWJF DataHub	Yes	Up
Public health and prevention	Health promotion and prevention	Tobacco prevention spending	Tobacco prevention and control spending as a percent to the Centers for Disease Control and Prevention-recommended level	-	FY 2014	0	American Lung Association, The State of Tobacco Control	Yes	Up
Public health and prevention	Health promotion and prevention	Seat belt use	Percent of front seat occupants using a seat belt	2011	2012	0	National Highway Traffic Safety Administration	Yes	Up
Public health and prevention	Health promotion and prevention	Sales of opioid pain relievers	Kilograms of opioid pain relievers sold per 10,000 population, measured in morphine equivalents	-	2010	0	Drug Enforcement Agency, as compiled by Trust for America's Health	Yes	Down
Public health and prevention	Health promotion and prevention	WIC at farmers markets	Percent of farmers markets that accept WIC coupons	-	2013	13	Centers for Disease Control and Prevention State Indicators Report on Fruits and Vegetables 2013	No	Up
Public health and prevention	Health promotion and prevention	Safe sleep	Percent of infants most often laid on his or her back to sleep	2009	2010	24	Centers for Disease Control and Prevention, Pregnancy Risk Assessment Monitoring System	No	Up
Public health and prevention	Health promotion and prevention	Home visiting	Percent of women who report a home visitor came to their home before or after their most recent pregnancy to help them prepare for their new baby and/or to help them learn how to take care of themselves or their new baby	-	To be reported in 2015	NA	Centers for Disease Control and Prevention, Pregnancy Risk Assessment Monitoring System	No	Up
Public health and prevention	Health promotion and prevention	Youth distracted driving	Percent of youth who report that they texted or e-mailed while driving a car or other vehicle on at least one day during the past 30 days	-	2013	13	Centers for Disease Control and Prevention, Youth Risk Behavior Surveillance System	No	Down
Public health and prevention	Health promotion and prevention	Falls among older adults	Percent of adults age 65 and older who report having had a fall within the last 3 months	-	2012	1	Behavioral Risk Factor Surveillance System, as compiled by America's Health Rankings Senior Report 2014 edition	Yes	Down

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Public health and prevention	Equity	Safe sleep, income level	Percent of infants most often laid on his or her back to sleep, by income level	-	2010	24	Centers for Disease Control and Prevention, Pregnancy Risk Assessment Monitoring System	No	Up
Social and economic environment	Education	Preschool enrollment	Percent of 3 and 4 year-olds enrolled in preschool. Kids Count Data Center (secondary source) displays the percent of children NOT enrolled in preschool. Because the metric is the percent of children that ARE enrolled, values were subtracted from 100%.	2010	2011	0	US Census Bureau, American Community Survey, as compiled by Kids Count Data Center	Yes	Up
Social and economic environment	Education	4 th grade reading	Percent of 4th graders proficient in reading	2011	2013	0	US Department of Education, National Assessment of Educational Progress, as compiled by Kids Count Data Center	Yes	Up
Social and economic environment	Education	High school graduation	Percent of incoming 9th graders who graduate in 4 years from a high school with a regular degree	2008-09	2010	0	National Center for Education Statistics, as compiled by America's Health Rankings 2013 edition	Yes	Up
Social and economic environment	Education	Educational attainment	Percent of adults over age 25 with a Bachelor's Degree or Higher	2008	2009	0	US Census Bureau, American Community Survey	Yes	Up
Social and economic environment	Employment and poverty	Unemployment	Annual average unemployment rate, ages 16 and older	2012	2013	0	Bureau of Labor Statistics	Yes	Down
Social and economic environment	Employment and poverty	Child poverty	Percent of persons under age 18 who live in households at or below the poverty threshold (<100% FPG)	2011	2012	0	US Census Bureau, Current Population Survey	Yes	Down
Social and economic environment	Employment and poverty	Adult poverty	Percent of persons age 18+ who live in households at or below the poverty threshold (<100% FPG)	2011	2012	0	US Census Bureau, Current Population Survey	Yes	Down
Social and economic environment	Family and social support	Single-parent households	Percent of children living in single-parent households	2011	2012	0	US Census Bureau, American Community Survey, as compiled by Kids Count Data Center	Yes	Down
Social and economic environment	Family and social support	Teen birth rate	Rate per 1,000 of births to females 15-19 years of age	2011	2012	1	Centers for Disease Control and Prevention Vital Statistics	Yes	Down

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Social and economic environment	Family and social support	Social-emotional support	Percent of adults without social-emotional support. Age adjusted.	-	2006-2012	0	Behavioral Risk Factor Surveillance System, as compiled by Health Indicators Warehouse	Yes	Down
Social and economic environment	Family and social support	Social capital and cohesion	Composite measure that includes connections with neighbors, supportive neighborhoods, voter turnout, and volunteerism	-	2013	1	National Health Security Preparedness Index	Yes	Up
Social and economic environment	Trauma, toxic stress and violence	Child abuse and neglect	Rate of child maltreatment victims per 1,000 children in population	2011	2012	1	Administration for Children and Families	Yes	Down
Social and economic environment	Trauma, toxic stress and violence	Adverse childhood experiences	Percent of children who have experienced two or more adverse experiences, such as death of a parent, parent served time in jail, witness to domestic violence, or lived with someone with a drug or alcohol problem	-	2011	0	National Survey of Children's Health	Yes	Down
Social and economic environment	Trauma, toxic stress and violence	Violent crime	Violent crime rate per 100,000 inhabitants	-	2013	0	National Incident-Based Reporting System/Uniform Crime Reporting, Federal Bureau of Investigation	Yes	Down
Social and economic environment	Equity	Income inequality	The Gini coefficient is a number between zero and one that measures the extent of inequality in the distribution of income. Estimates closer to one indicate greater income inequality.	2012	2013	0	US Census Bureau, American Community Survey, as compiled by RWJF DataHub	Yes	Down
Social and economic environment	Equity	Fourth-grade reading, free/reduced lunch (economically disadvantaged children)	Percent of 4th-graders who qualify for free/reduced lunch (economically disadvantaged children) and who are proficient in reading	2011	2013	0	US Department of Education, National Assessment of Educational Progress, as compiled by Kids Count Data Center	No	Up
Social and economic environment	Equity	4 th grade reading, White children	Percent of White 4th-graders proficient in reading	2011	2013	0	US Department of Education, National Assessment of Educational Progress, as compiled by Kids Count Data Center	No	Up
Social and economic environment	Equity	4 th grade reading, Black children	Percent of Black 4th-graders proficient in reading	2011	2013	4	US Department of Education, National Assessment of Educational Progress, as compiled by Kids Count Data Center	No	Up
Social and economic environment	Equity	4 th grade reading, Hispanic children	Percent of Hispanic 4th-graders proficient in reading	2011	2013	3	US Department of Education, National Assessment of Educational Progress, as compiled by Kids Count Data Center	No	Up

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Social and economic environment	Equity	4 th grade reading, Asian children	Percent of Asian 4th-graders proficient in reading	2011	2013	14	US Department of Education, National Assessment of Educational Progress, as compiled by Kids Count Data Center	No	Up
Physical environment	Air, water and toxic substances	Outdoor air quality	Average exposure of the general public to particulate matter of 2.5 microns or less in size (PM2.2)	2012	2013	0	Environmental Protection Agency, as compiled by America's Health Rankings 2013 edition	Yes	Down
Physical environment	Air, water and toxic substances	Children exposed to secondhand smoke	Percent of children who live in a home where someone uses tobacco or smokes inside the home	2007	2011	0	National Survey of Children's Health	Yes	Down
Physical environment	Air, water and toxic substances	Safe drinking water	Percent of population exposed to water exceeding a violation limit during the past year	-	2011	0	US Environmental Protection Agency, Safe Drinking Water Information System	Yes	Down
Physical environment	Air, water and toxic substances	Fluoridated water	Percent of the population served by a community water system with optimally fluoridated water	2010	2012	0	Centers for Disease Control and Prevention, Water Fluoridation Reporting System	Yes	Up
Physical environment	Air, water and toxic substances	Toxic pollutants	Total pounds of toxic chemicals released into the environment per capita (total on-site disposal or other releases for all industries and all chemicals). The Toxic Release Inventory (TRI) includes information about releases of toxic chemicals from facilities (including air, water, land on-site, and deepwell injection) but does not reveal whether or to what degree the public is exposed to these chemicals. For this dashboard, the total pounds of chemicals released in each state from the TRI database were applied to the total population size of each state to calculate a per capita amount. The numerator is from EPA, reported total on-site disposal or other releases. Denominator from American Community Survey 2011/2012 1-year population estimates.	2011	2012	0	Numerator: US Environmental Protection Agency, Toxics Release Inventory Denominator: US Census Bureau, American Community Survey 1-year population estimates	Yes	Down
Physical environment	Air, water and toxic substances	Lead poisoning	Percent of young children with elevated blood lead levels (BLL >10 ug/dL)	2011	2012	23	Centers for Disease Control and Prevention, Childhood Blood Lead Surveillance Data	No	Down
Physical environment	Food access and food insecurity	Healthy food access	Percent of population with limited access to healthy food, defined as the percent of low-income individuals (<200% FPG) living more than 10 miles from a grocery store in rural areas and more than 1 mile in non-rural areas	-	2010	0	US Department of Agriculture, Food Research Atlas	Yes	Down
Physical environment	Food access and food insecurity	Food insecurity	Percent of households that are food insecure	-	2010-2012	0	US Census Bureau, Current Population Survey	Yes	Down

Domain	Subdomain	Metric	Metric Description	Base Year	Most recent year	# of missing states most recent year	Data source	Metric included in composite rankings?	Desired direction*
Physical environment	Housing, built environment and access to physical activity	Severe housing problems	Percent of households that have one or more of the following problems: 1) housing unit lacks complete kitchen facilities; 2) housing unit lacks complete plumbing facilities; 3) household is severely overcrowded, 4) monthly housing costs, including utilities, that exceed 50% of monthly income	-	2006-2010	0	US Department of Housing and Urban Development, as compiled by County Health Rankings 2014 edition	Yes	Down
Physical environment	Housing, built environment and access to physical activity	Access to exercise opportunities	Percent of individuals in a county who live reasonably close to a location for physical activity, defined as parks or recreational facilities	-	2010 and 2012	0	OneSource Global Business Browser and U.S. Census Bureau, as compiled County Health Rankings 2014 edition	Yes	Up
Physical environment	Housing, built environment and access to physical activity	Alternative commute modes	Percent of trips to work via bicycle, walking, or mass transit (combined)	2009	2012	0	US Census Bureau, American Community Survey	Yes	Up
Physical environment	Housing, built environment and access to physical activity	Neighborhood safety	Percent of parents who report their children are living in a safe neighborhood	2007	2011	0	National Survey of Children's Health	Yes	Up
Physical environment	Housing, built environment and access to physical activity	Safe Routes to School Programs	Percent of K-8 public district schools with a completed school travel plan as of September 2014 (cumulative total). The number of schools with a completed school travel plan (numerator) was reported directly from the Ohio Department of Transportation and divided by the number of K-8 regular public school (1,560) from the Common Core Data Institute of Education Sciences.	-	2014 (cumulative as of September 2014)	OH only data	Ohio Department of Transportation (numerator) and Common Core Data Institute of Education Sciences (denominator)	No	Up
Physical environment	Housing, built environment and access to physical activity	Complete Street policies	Number of communities that have adopted complete streets policies	-	2012	OH only data	Smart Growth America and National Complete Streets Coalition	No	Up
Physical environment	Equity	Residential segregation	Black-White dissimilarity index for Ohio's biggest metro areas (Columbus, Cleveland, Cincinnati, Toledo, Akron, Dayton)	2009	2010	OH only data	American Communities Project, Brown University	No	Down

Note: "OH only data" indicated that data was only available for Ohio, and "-" means data is not available.
